Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet -- but bad policies allow companies like AT&T and Verizon to shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use the 700MHz spectrum auction to create an open network that gives consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive wholesale marketplace.
3. The freedom to access any content or services we want through our devices.

Sincerely,

Jack Allen

Mano Appapillai (manoappapillai@gmail.com) writes:

The upcoming 700MHz auction is an opportunity from the American consumer to break free of the choke hold that wireless providers today have on a vital part of our communications infrastructure. Please ensure that we open the spectrum to competition and have innovative players bring us what we have long waited for and deserve. We are a leader to the world in technology but a laggard in "tele" communications.

Let's change that.

The rest of the world meanwhile moves ahead of the USA.

Thank You

Federal Communications Commission  
445 12th Street SW  
Washington, DC 20554

Dear Federal Communications Commission,

The iPhone has set the stage for the future of mobile Internet  
-- but bad policies allow companies like AT&T and Verizon to  
shackle great gadgets to their closed networks.

To free wireless Internet, the FCC and Congress must use the  
700MHz spectrum auction to create an open network that gives  
consumers:

1. The freedom to use whatever device we want on any network.
2. The freedom to choose among many providers in a competitive  
wholesale marketplace.
3. The freedom to access any content or services we want through  
our devices.

Sincerely,

Erica St. John
